

Emergency Center Lower-Risk BRUE Clinical Pathway

Should:

- Educate caregivers on BRUE and engage in shared decision-making to guide evaluation, disposition, and follow-up
- CPR training resources

May:

- Test for pertussis
- EKG
- Monitor patient with pulse ox and serial exams

Should not:

- Do any lab/image testing
- Initiate home cardiopulmonary monitoring
- Prescribe GER or seizure medications

Need not:

- Obtain viral testing, UA, BG, electrolytes, lactic acid, or neuroimaging
- Admit patient to hospital solely for monitoring

Abbreviations: BG, blood glucose; CPR, cardiopulmonary resuscitation; EKG, electrocardiogram; EMS, emergency medical services; ox, oximeter; UA, urinalysis
